

Job Description

Impact Investment Senior Analyst

Impact Measurement and Management

Innovest Advisory

August 2021

ABOUT US

Innovest Advisory is an impact investment advisory firm which seeks to unleash the power of public and private capital to address some of the world's most challenging issues through a rigorous focus on impact.

We provide a full range of services to fund managers and social impact companies that want to be more intentional about impact. We help our clients develop innovative funding structures and develop impact management frameworks, and we leverage our international network to contribute funding, know-how and capabilities to achieve agreed development outcomes in line with the United Nations Sustainable Development Goals (SDGs). Our impact services include impact strategy development, impact measurement and management, impact due diligence, design of impact incentives, managing impact risk, impact verification and other related impact services.

We work across a spectrum of sectors, with a particular focus on financial inclusion, agriculture and energy, and we see a growing demand for services in climate change and environmental

sustainability. We work globally, with a particular focus on Europe and Africa and other developing markets.

We believe that effective impact measurement and management are essential in order to ensure the impact integrity of funds deployed in the eyes of investors and other stakeholders, and we work to drive best practise and continued innovation.

Visit our website for more information about us www.innovestadvisory.com

ABOUT THE ROLE

We are seeking a purpose driven and motivated individual to join our rapidly growing team to support our impact investment advisory services. The individual will support our client engagements with impact investors, impact funds, private wealth and impact social enterprises. You will be at the forefront of developing and assessing impact measurement frameworks across a number of sectors, in order to drive enhanced social and environmental performance of investment funds and companies.

This is an opportunity to become part of an innovative growing business working to improve the lives of people and the planet, especially in emerging and frontier countries, and to work towards the achievement of the UN Sustainable Development Goals.

RESPONSIBILITIES

Reporting to the Impact Lead, you will:

- Deliver on client engagements, including developing impact strategies, theories of change, impact management framework and impact metrics for clients such as impact funds, private wealth portfolios, corporates or impact enterprises.
- Implement impact measurement, management and reporting for our clients, utilising a range of impact data collection methodologies, and bringing in expert analysis that draws up on best practises in socio-economic development and/or climate and environmental sustainability.
- Project management of client engagement including the preparation of deliverables

- Support to business development, including drafting proposals, capability statements, presentations, case studies and communications
- Supporting the development and maintenance of internal systems, project management tools, databases, CRM management and client delivery templates.
- Engaging with the social and environmental impact focussed ecosystem, representing Innovest and bringing network opportunities.
- Author thought leadership pieces including articles, studies, insights and social media content

ESSENTIAL QUALITIES

- BSc/MSc degree in a relevant field, including but not limited to: Development Studies, Development Economics, Sustainable Development
- 4-5 years relevant work experience in socio-economic development.
- Experience and/or proven interest in sectors of socio-economic development including but not limited to: financial inclusion, agriculture, water, energy, housing, education, climate change and biodiversity.
- Experience working in developing economies or for clients in developing economies
- Experience in a consultancy environment or a development institution.
- Strong quantitative skills and competence with data analysis and visualisation, and a desire to learn tools such as Google DataStudio
- Strong interpersonal skills and an understanding of adapting your approach to suit different contexts.

DESIRABLE QUALITIES

- Experience designing, testing and refining impact measurement, management or evaluation approaches.
- Strong project management skills are desirable.

LOCATION

As a global business, candidates will work with our teams in Johannesburg, London, Guernsey and Jersey. You will ideally be based in Johannesburg, South Africa, Guernsey or Jersey. You will require the right to work in these territories.

Salary will be competitive and commensurate with experience.

APPLICATION

If you're interested in joining our growing and dynamic team, please email your cover letter and CV to info@innovestadvisory.com

Applications close on 10th September 2021. Interviews may commence before the closing date therefore we encourage early applications.
